**1.1 : Preface about the Institution:**

SRI BHARATHI ENGINEERING COLLEGE FOR WOMEN was established by the Sri Bharathi Educational Trust in 2009, offering five B.E/B.Tech courses aimed at providing quality education for rural women. Situated on the outskirts of Pudukkottai, the college is approximately 6 kilometers from the town, nestled in a rural setting. The undergraduate programs available include Civil Engineering, Computer Science and Engineering, Electrical and Electronics Engineering, Electronics and Communication Engineering, and Information Technology. The college features a well-equipped digital library with high-speed internet access, benefiting both students and faculty. The library houses a variety of International and National Journals and Magazines. With a team of well-qualified faculty members and modern infrastructure, the college boasts well-equipped laboratories. The main building consists of G+3 floors, covering a total carpet area of 80,000 square feet, while an additional G+1 building has a carpet area of 27,000 square feet. The college has received permanent affiliation for two departments: Computer Science and Engineering and Electronics and Communication Engineering, and it has been accredited with an A grade by NAAC.

**1.1 : Handling of Chemicals / Salts / Acids used in the Laboratories:**

- The S & H and Civil departments use chemicals for experimental applications and are having strict safety rules as follows;
- Well trained faculty and lab assistants who have knowledge about the hazardous nature of each and every chemical are only allowed to handle the chemicals safely.
- Strictly follow the manufacturer's instruction on the container in order to prevent accidents.
- Volatile or highly odorous chemicals, fuming acids are stored in a ventilated area. Chemicals are stored in eye level and never on the top shelf of storage unit.
- All stored chemicals; especially flammable liquids are kept away from heat and direct sunlight. Reactive chemicals are not stored closely.
- Hazardous and corrosive chemicals are kept on sand platform to avoid corrosion.

First aid box and fire extinguishers are readily available in the laboratory

**1.2 : Storage of Chemicals / Salts / Acids:**

- Less concentrated chemicals, salts and acids are stored in proper racks; cupboard and high concentrated acids are stored in separate area filled with sand.
- Most of the chemicals, salts and acids used in the science departments are inorganic in nature and no harmful effects are created during the experiment process.
- Only trained teaching and non-teaching staffs are handling the chemicals and also they are well trained to handle any abnormal situations.
- Laboratories with chemicals are well ventilated with proper emergency exits. Adequate and correct sequence of fire extinguishers is placed near all the laboratories.

### 1.3 Use of Chemical for Vessels & Floor Cleaning:

In order to maintain hygiene in the College campus; the administration regularly clean the floor sand restrooms. In addition to this, the hostel management has to monitor the cleaning of vessels, kitchen floor, dining hall, store room and gas station. Table-1 shows the cleaning agents used to clean the above mentioned area;

**Table-1: Cleaning Agents used for Floor and Vessel Cleaning**

S.No.	Cleaning Agent	Application
1	Soap & Washing Powder	Vessel Cleaning
2	Soap Oil & Bleaching Powder	Floor Cleaning

### 1.4 : Recommendations: Eco Friendly – Green Cleaning Agents:

- On an average; the cleaning agents used today have about 51 harmful chemicals like Paraben, Phosphates or Chlorides. A lot of them are multi-purpose cleaners
- It is recommended to use natural ingredients like orange peel extract & vinegar. It leaves a mild and pleasant fragrance after use. The formula is free from all harmful chemicals & toxins. It is pH-neutral, gentle on the skin as well as on the surface where it is used
- Fig.1 shows the sample eco-friendly Green Pro certified cleaning agents used in the Institution for cleaning purpose.
